

REMOTE FIRST ASSESSMENTS FROM SIMPLE STUFF WORKS

#SimpleSafeSecure

WHY ARE WE HERE?

To see how we can make you comfortable in bed and how we can use some of our equipment to keep you safe and relaxed

To allow you, your family, your therapist and our advisor to discuss what would be helpful for you

WHAT WILL HAPPEN?

- We will need to see you in your bed if possible and know how you would normally sleep
- Can you think about how you like to sleep? Do you sleep in bed with anyone else? Do you find certain things about bedtime challenging?
- You may be asked to show us how you move in bed, whether independently or with help, so we can see what equipment will work

WHAT EQUIPMENT MIGHT WE NEED?

EQUIPMENT

- All of our equipment is soft, gentle and supportive
- Nothing is designed to hold you down to the bed
- You may need something as simple as a pillow, or you may need something more structured, but we can guarantee nothing will hurt you
- You will have a chance to look at all the equipment during the assessment

WHAT HAPPENS NEXT?

- Following your assessment our advisor will advise on what they think you may find helpful
- If you and your therapist agree then the equipment will be organised and delivered
- We will arrange another remote call to set this up and make sure you feel happy and comfortable with everything
- We are available for unlimited remote reviews to make sure you get the most out of your equipment

SAFETY FIRST

- Make sure you have read through the Safety Checklist found [here](#) and begin implementing
- Practice in the day at first to get used to the kit
- Ensure everyone is confident and happy before using the equipment
- Take things slowly...
